EDUCATION

Pandit Deendayal Energy University — Gandhinagar, Gujarat
B. Tech in Computer Science Engineering, CGPA: 8.98/10 — July 2024 – Present

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C++, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Data Science & Analytics: NumPy, Pandas, Matplotlib, Seaborn

Tools: Git, GitHub, Docker, VS Code, Postman, Cloudinary

Concepts: REST APIs, JWT Authentication, WebSockets, WebRTC, Data Analysis, Data Visualization

EXPERIENCE

Full Stack Intern | *200OK Solutions* — May 2026 – Present

- Gaining hands-on experience in MERN Stack development (MongoDB, Express.js, React.js, Node.js).
- Building responsive user interfaces using React.js, Tailwind CSS, and modern JavaScript (ES6+).
- Developing backend services and REST APIs with Node.js and Express.js.
- Working with MongoDB for data modeling, querying, and database management.
- Applying Git-based version control and Agile development methodologies.

NOTABLE PROJECTS

Wanderlust – Travel Stay Booking Platform | Live Link | *MongoDB, Express.js, Node.js, EJS, Cloudinary, Render*

- Engineered a full-stack travel stay booking platform inspired by Airbnb using the MERN backend ecosystem and MVC architecture.
- Designed and implemented CRUD operations for listings and reviews, secure user authentication with Passport.js, and authorization middleware for resource ownership validation.
- Integrated Cloudinary-based image uploads and MongoDB Atlas for scalable data storage and management.
- Deployed the application on Render, providing a publicly accessible platform for property discovery and management.

Unilearn – Comprehensive Online Learning Platform | Live Link | *React 18, Node.js, Express, MongoDB, WebRTC (PeerJS), Socket.io, Tailwind CSS, Vite*

- Developed a full-stack educational platform enabling users to browse, enroll in, and progress through structured courses and video lectures.
- Engineered real-time interaction features using Socket.io and WebRTC, supporting live communication and integrated threaded Q&A discussions within courses.
- Built secure user authentication with JWT and bcryptjs and designed robust RESTful APIs with Express to manage student courses, ratings, reviews, and detailed progress tracking.
- Designed a responsive and dynamic user-interface using React Router v6 and Tailwind CSS for seamless course navigation and multimedia consumption.

Attendance Tracker System | Live Link | *React, Node.js, Express, MongoDB, Docker, Tailwind CSS*

- **Full-Stack Application:** Designed and developed a comprehensive web-based attendance tracking system using the MERN stack to efficiently manage user authentication, courses, and attendance records.
- **Modern Frontend:** Built a responsive and interactive user interface using React and Vite, utilizing Tailwind CSS for styling and Recharts for visualizing attendance data.
- **Robust Backend & API:** Developed a RESTful API with Node.js and Express to handle core business logic and routing, utilizing MongoDB with Mongoose for structured data modeling (Users, Courses, Attendance).
- **Secure Authentication:** Implemented secure user authentication and authorization utilizing JSON Web Tokens (JWT) and bcrypt for password hashing.
- **Containerized Deployment:** Containerized the frontend and backend applications using Docker, managing multi-container orchestration with Docker Compose for a seamless and isolated development environment.

EXTRACURRICULAR ACTIVITIES

Competitive Programming Platform | *LeetCode*

- Solved 150+ problems on LeetCode.
